

COMBUSTION AND FLAME

THE JOURNAL OF THE COMBUSTION INSTITUTE

VOLUME 89

VOLUME 89

NUMBER 1

APRIL 1992

Contents

Obituary: Glenn Carber Williams	1
M. M. DELICHATSIOS and M. A. DELICHATSIOS (Norwood, MA) Effects of Transient Pyrolysis on Wind-Assisted and Upward Flame Spread	5
PEDRO F. EMBID (Albuquerque, NM) and ANDREW J. MAJDA (Princeton, NJ) An Asymptotic Theory for Hot Spot Formation and Transition to Detonation for Reactive Granular Materials	17
EUGENE MILLER and L. GLEN McMILLION (Reno, NV) The Suppression of Opposed-Jet Methane-Air Flames by Methyl Bromide	37
M. FAIRWEATHER (Solihull, U.K.), W. P. JONES, and R. P. LINDSTEDT (London, U. K.) Predictions of Radiative Transfer from a Turbulent Reacting Jet in a Cross-Wind	45
SHWIN-CHUNG WONG and AR-CHENG LIN (Hsinchu, Taiwan) Microexplosion Mechanisms of Aluminum/Carbon Slurry Droplets	64
J. P. SINGH and F. Y. YUEH (Starkville, MS) Comparative Study of Temperature Measurement with Folded BOXCARS and Collinear CARS	77
ROBERT C. BROWN, JEFFREY AHRENS, and NEARCHOS CHRISTOFIDES (Ames, IA) The Contributions of Attrition and Fragmentation to Char Elutriation from Fluidized Beds	95
J. A. MULHOLLAND, A. F. SAROFIM, P. SOSTHIKUL, P. A. MONCHAMP, E. F. PLUMMER, and A. L. LAFLEUR (Cambridge, MA) Formation of Perchloroaromatics during Trichloroethylene Pyrolysis	103
Erratum	116

Contents

J. KANG, P. B. BUTLER (Iowa City, Iowa), and M. R. BAER (Albuquerque, NM) A Thermomechanical Analysis of Hot Spot Formation in Condensed-Phase, Energetic Materials	117
Ü. Ö. KÖYLÜ and G. M. FAETH (Ann Arbor, MI) Structure of Overfire Soot in Buoyant Turbulent Diffusion Flames at Long Residence Times	140
A. WILLIAMS, R. WOOLLEY, and M. LAWES (Leeds, UK) The formation of NO _x in Surface Burners	157
A. R. MASRI (Sydney, Australia), R. W. DIBBLE (Berkeley, CA), R. S. BARLOW (Livermore, CA) The Structure of Turbulent Nonpremixed Flames of Methanol Over a Range of Mixing Rates	167
E. SHER, J. BEN-YA'ISH, and T. KRAVCHIK (Beer Sheva, Israel) On the Birth of Spark Channels	186
S. M. CORREA and A. GULATI (Schenectady, NY) Measurements and Modeling of a Bluff Body Stabilized Flame	195
E. SHER and N. OZDOR (Beer Sheva, Israel) Laminar Burning Velocities of <i>n</i> -Butane/Air Mixtures Enriched with Hydrogen	214
THEODORE A. STEINBERG, GEORGE P. MULHOLLAND, D. BRUCE WILSON, and FRANK J. BENZ (Las Cruces, NM) The Combustion of Iron in High-Pressure Oxygen	221
T. P. SHARMA, R. S. CHIMOTE, B. B. LAL, and JAGBIR SINGH (Roorkee, India) Experiments on Extinction of Liquid Hydrocarbon Fires by a Particulate Mineral	229
Comments	
J. F. STUBINGTON (Kensington, Australia) Comment on "Combustion of Methane and Propane in an Incipently Fluidized Bed" by Hesketh and Davidson	235
R. P. HESKETH and J. F. DAVIDSON (Cambridge, UK) Response to Comment by J. F. Stubington on "Combustion of Methane and Propane in an Incipently Fluidized Bed" by Hesketh and Davidson	236

Contents

A. TEWARSON and S. D. OGDEN (Norwood, MA) Fire Behavior of Polymethylmethacrylate	237
N. N. SMIRNOV and I. D. DIMITRIENKO (Moscow, Russia, C.I.S.) Convective Combustion of Porous Compressible Propellants	260
IAN J. DAGLEY, SOOK YING HO, LUCIANA MONTELLI, and CRAIG N. LOUEY (Melbourne, Australia) High Strain Rate Impact Ignition of RDX with Ethylene-Vinyl Acetate (EVA) Copolymers	271
ISKENDER GÖKALP, CHRISTIAN CHAUVEAU, OLIVIER SIMON, and XAVIER CHESNEAU (Orléans, France), Mass Transfer from Liquid Fuel Droplets in Turbulent Flow	286
J. S. SHUEN (Cleveland, OH), VIGOR YANG, and C. C. HSIAO (University Park, PA) Combustion of Liquid-Fuel Droplets in Supercritical Conditions	299
R. K. KUMAR, E. M. BOWLES (Pinawa, Canada), and K. J. MINTZ (Ottawa, Canada) Large-Scale Dust Explosion Experiments to Determine the Effects of Scaling on Explosion Parameters	320
K. SESHADRI, A. L. BERLAD, and V. TANGIRALA (La Jolla, CA) The Structure of Premixed Particle-Cloud Flames	333
M. BUI-PHAM, K. SESHADRI, and F. A. WILLIAMS (La Jolla, CA) The Asymptotic Structure of Premixed Methane-Air Flames with Slow CO Oxidation	343
 Brief Communication	
W. SHYY, R. MITTAL, and H. S. UDAYKUMAR (Gainesville, FL) Control of Longitudinal Oscillations in a Constant Area Combustor: Numerical Simulation	363
